Mob-Programming

EDUCATION

Alchemy Code Lab | 2022

Full-stack Software Developer

Portland State University | 2017

B.Sc. Environmental Science

PROJECTS

TrashApp | React, PostgreSQL, Cloudinary, Material UI, Node.js

A social media app where users can help each other determine whether their possessions are trash or treasure.

- Successfully integrated Cloudinary as a new technology for image hosting.
- Kept team on track by facilitating planning conversations and workflow check-ins.
- Strategically identified and resolved bugs to achieve full functionality.

Magica | React, Supabase, Netlify

A deck-building app that allows users to draft, save and edit a collection of decks using an extensive Magic the Gathering API.

- Co-piloted formatting and styling for a polished product.
- Incorporated 3rd party API to provide users with a comprehensive selection of Magic cards.

Alchememeetings the SQL | PostgreSQL, GitHub OAuth, Heroku

A backend built with SQL to provide a cleaner, more manageable user experience of the existing Alchemy Zoom classrooms.

- Remotely mob-programmed with a team of five in a one-week sprint.
- Enhanced confidence in app performance by implementing robust testing suites.

EXPERIENCE

Whole Foods Market

2019-2021: Associate Team Leader

- Maximized efficiency through the assessment and implementation of new policies, programs and best practices.
- Encouraged open communication to achieve mutual understandings

2018-2019: Supervisor

- Effectively handled competing priorities and deadlines in a fast-paced work environment.

2016-2018: Team Trainer

- Facilitated the individual development of 60+ team members.

2015-2016: Cashier

- Demonstrated commitment to personal growth through openly receiving constructive feedback.
